Project Name	Roadway median landscape improvements
From Location	Middle River (South)...City Limit
To Location	NE 26th Street
Work Mix	Bicycle Pedestrian Infrastructure
Phase	Construction
Fiscal Year 2020 Recommendation	YEAR 1 - Construction
Recommended Phase Funding	\$247,711
City Submitted Information	

Walkability, ADA access

Project Description

Project Scope

This project is following the completion of the FDOT complete streets reconstruction of Wilton Drive. The City intends to install irrigation, landscaping, and wayfinding signage within the existing right-of-way. Work will occur in medians, roadway bump outs, and sidewalk areas.

Project Objective

The project will result in an enhanced pedestrian environment by providing shade over sidewalks, median safety areas and parking spaces along the roadway. It will also provide improved signage to parking facilities, transit connections, important buildings, and points of interest within the city.

Estimated Project Cost	\$6,000,000
Project Type	Signs, Landscaping, Walls
Primary Work Mix	Landscaping
Secondary Work Mix	Signing/Pavement
Has design been completed?	Yes
If Design completed, what percent?	100
Is right-of-way required?	No
Has right-of-way/utility relocation coordination occurred?

Construction Readiness Review

Detailed budget provided?	Yes
Project timeline provided?	Yes
Is the project ready to submit for permits?	Yes

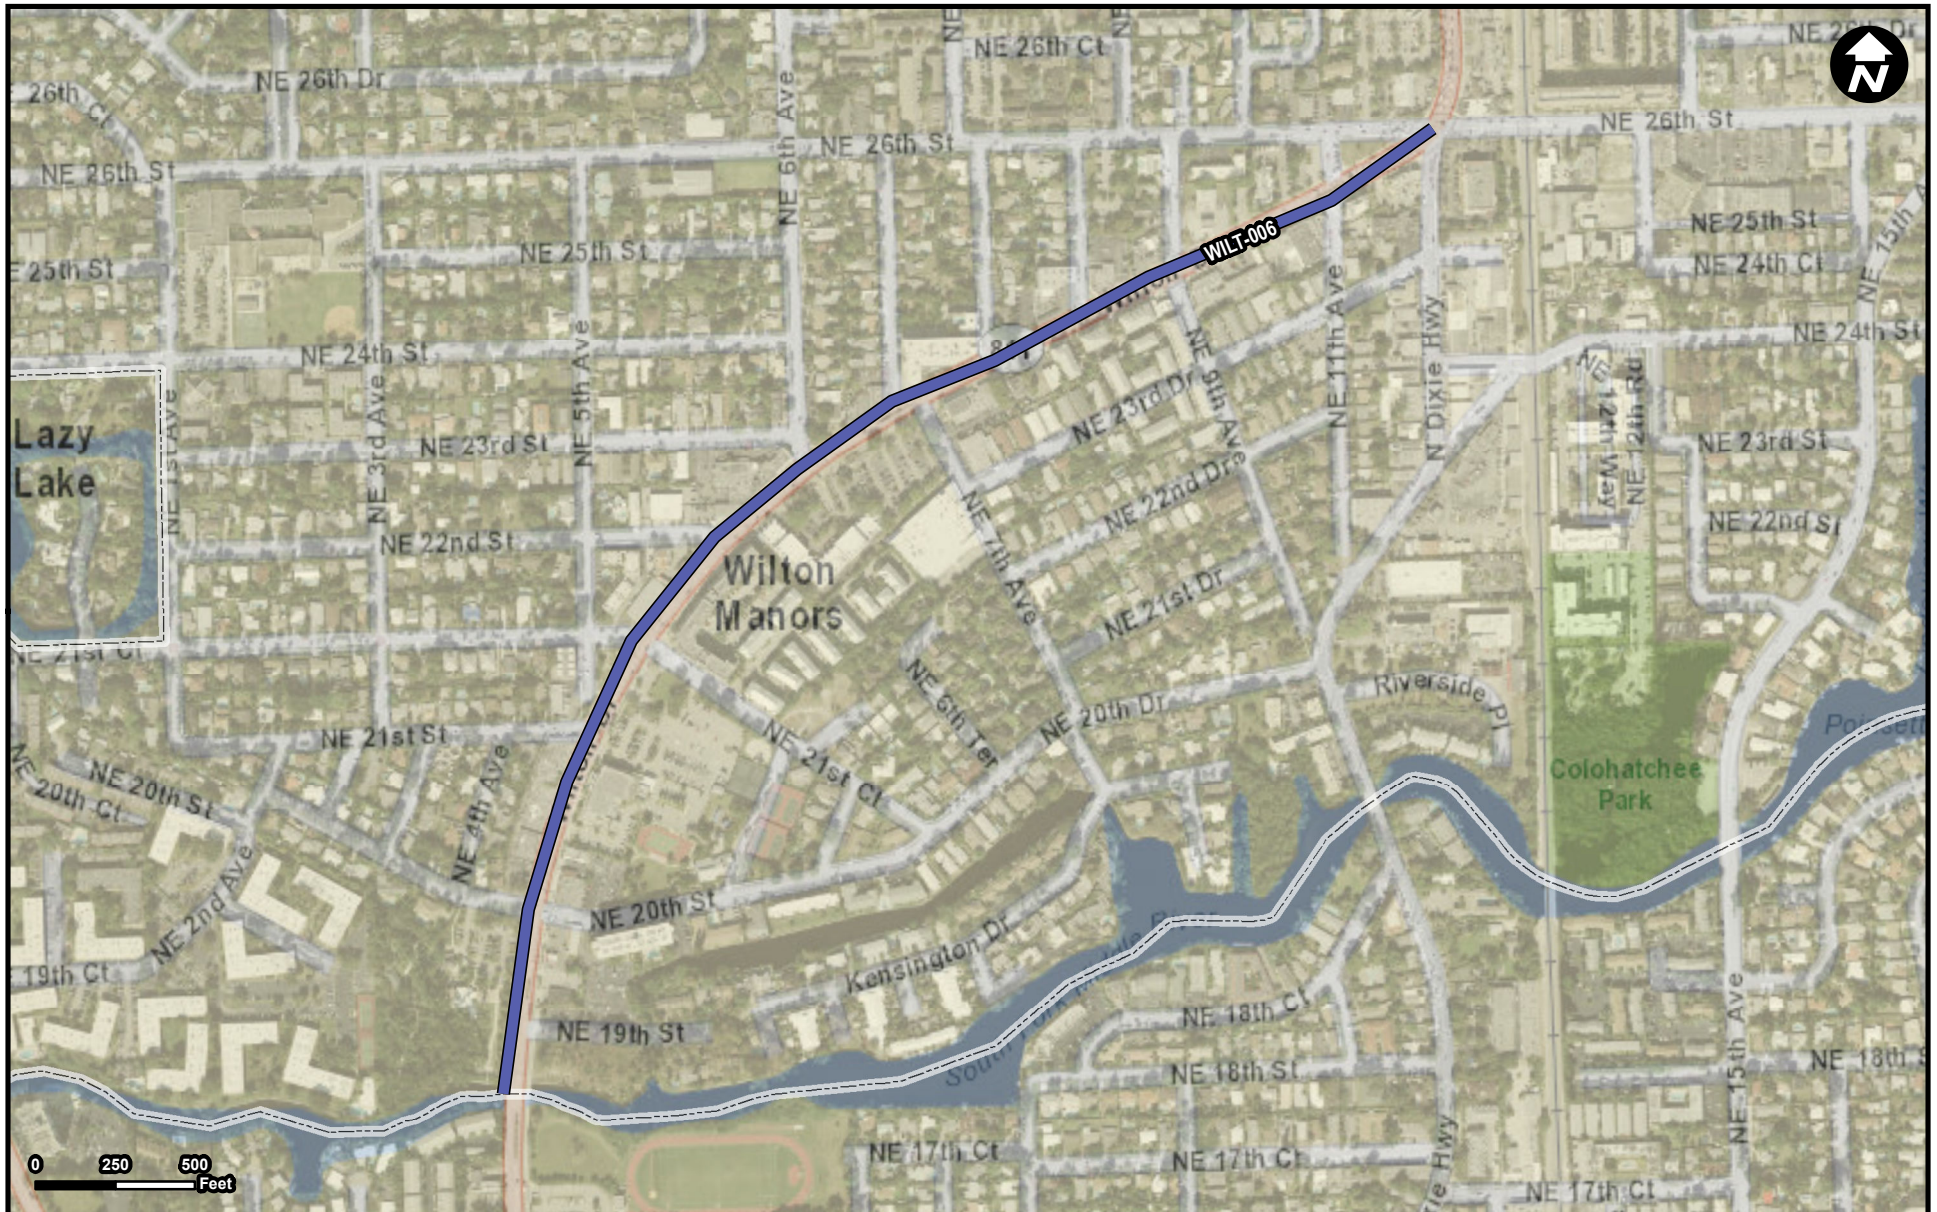

Readiness Review Comments:

The City provided plans and a detailed cost estimate for the proposed improvements and is awaiting the outcome of the surtax funding prior to bidding the proposed improvements for implementation. Project entails landscape improvements along Wilton Drive all within public ROW. The City provided detailed plans and a cost estimate for the improvements. The cost estimate is in line with current industry pricing.

The Municipal Surtax Capital Project Overview was prepared by the Broward MPO in partnership with the municipalities in Broward County. All project information was provided by the municipalities. Projects were provided by Broward County and were contained in the Surtax Plan approved by the voters in November 2018. Project review comments were based on the information provided by the municipalities.

Fiscal Year 2020 Recommendation	YEAR 1 - Construction
Recommended Phase Funding	\$5,180,000
City Submitted Information	
Project Description	Improvements to City drainage systems including storm drainage and canals to address drainage related issues.
Project Scope	In an effort to increase the resiliency of the community and transportation system, the City of Sunrise has hired a consultant to develop a Stormwater Master Plan. This plan has identified several projects throughout the City that can be implemented to increase the City's resiliency to storm events. Example of these projects include: culvert upgrades; pump station upgrades; new pump stations; installing flap gates, drainage structures and new pipes.
Project Objective	Increased rainfall, flooding and higher ground water elevation levels pose a risk to the community's transportation system. This is especially critical during emergency and evacuation operations. This project will address some of the problems that have been identified by the City's consultant in the 2019 Stormwater Master Plan Update. The drainage problem areas were identified by modeling the entire drainage system, using the latest LIDAR imagery, and running different rainfall events.
Estimated Project Cost	\$10,000,000
Project Type	Stormwater/Resiliency
Primary Work Mix	Safety Project

Fiscal Year 2020 Recommendation	YEAR 1 - Construction
Recommended Phase Funding	\$496,917
City Submitted Information	

Install emergency traffic signals at Fire Stations 71, 80 and 64.

Project Description

Project Scope	Construct emergency traffic signals with mast arms at two fire stations in the City of Coral Springs. Fire Station #71 located at 11800 NW 41st Street. Emergency signals are proposed for the intersection of Coral Ridge Drive and NW 41st Street.
----------------------	--

Project Objective	Emergency equipment and personnel exiting stations experience delays on emergency calls. Response times are compromised without emergency signals. Time delayed exiting a station due to lack of emergency traffic signals may be the difference in saving a life. Without the emergency signals, drivers may be surprised when emergency vehicles exit a station, which may result in a crash with the emergency vehicle or back ending vehicles that have slowed down.
--------------------------	--

Estimated Project Cost	\$900,000
Project Type	Traffic Signal
Primary Work Mix	Traffic Signals

Modernize the drainage master plan and stormwater improvements

Project Description

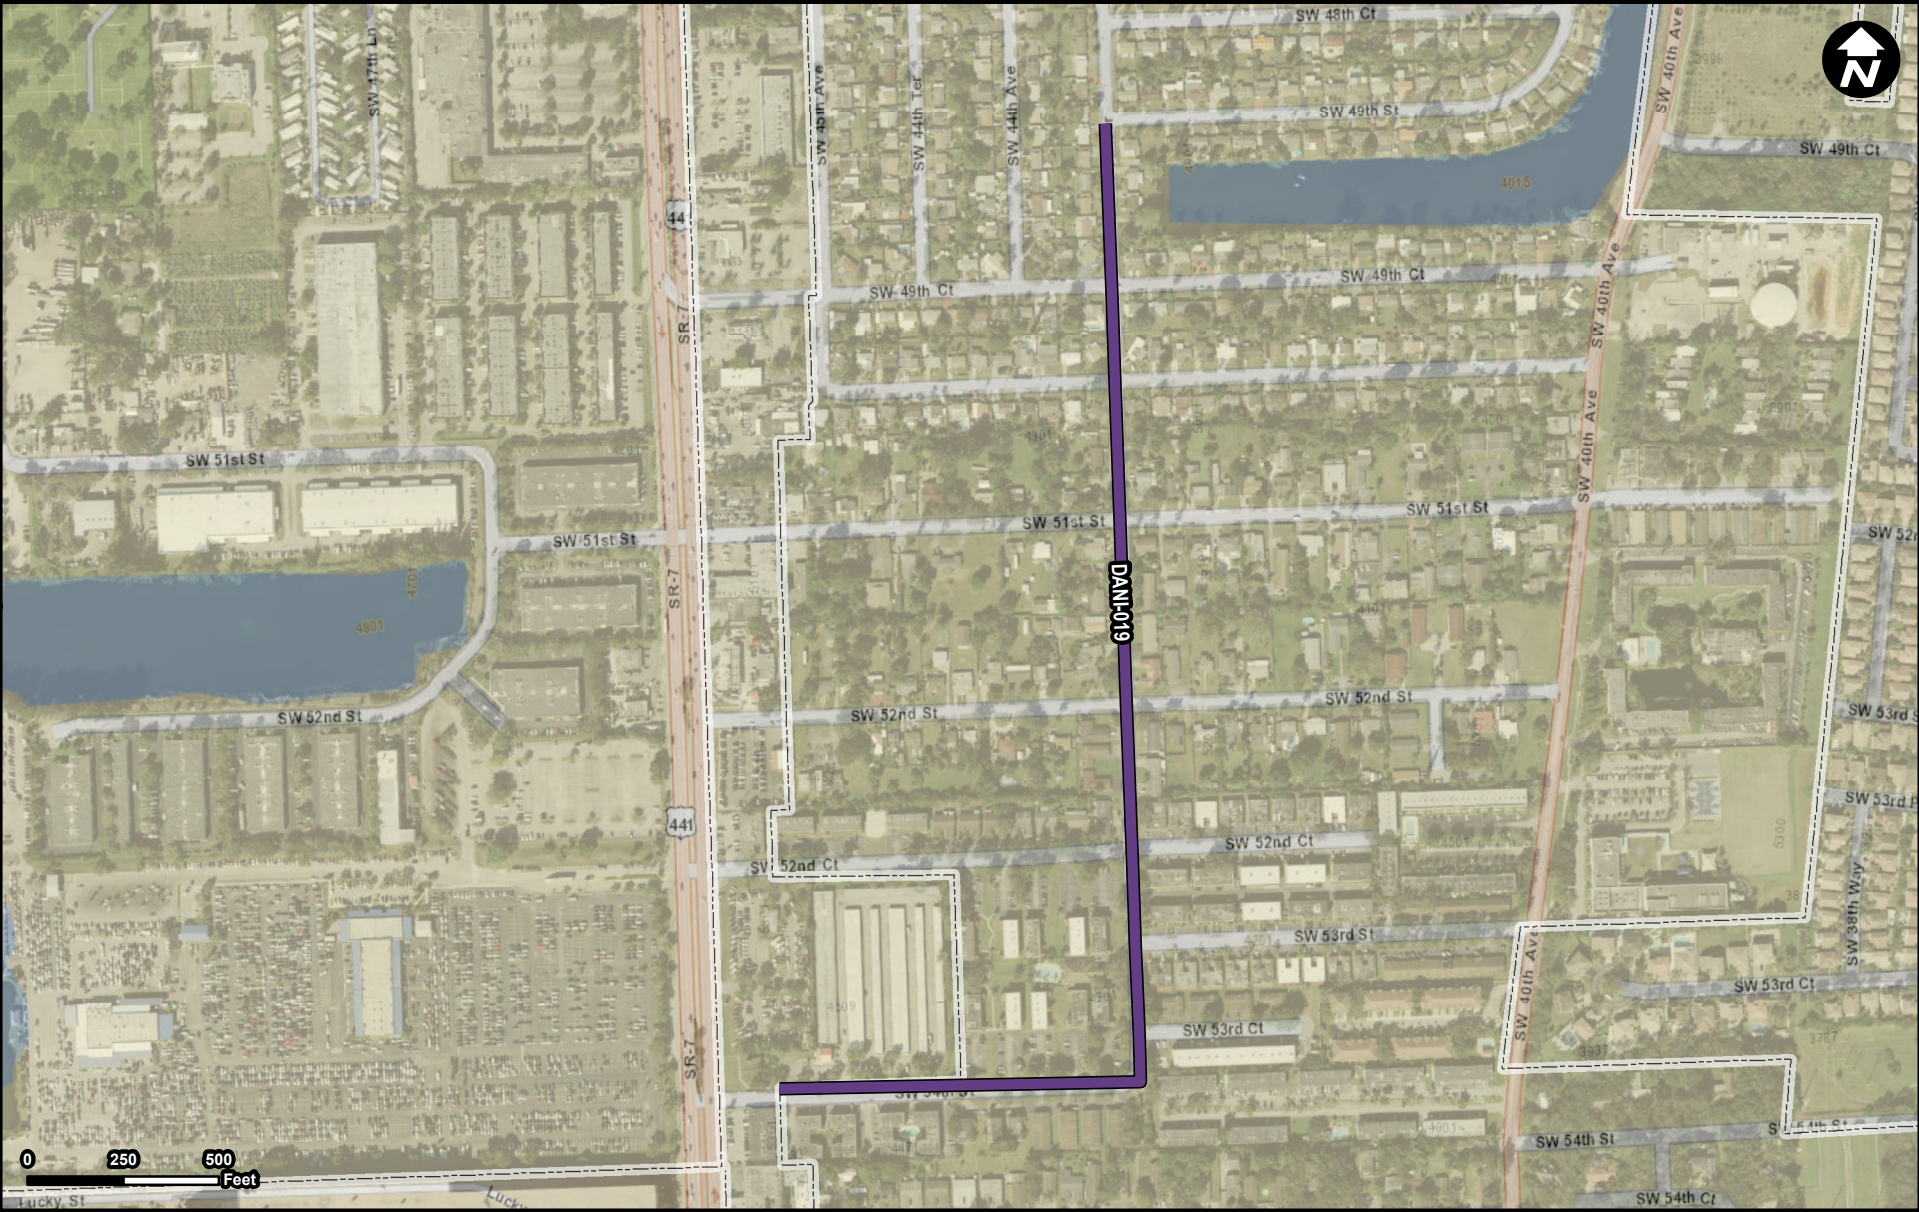

Project Scope	SW 43rd Terr and SW 54th Street are roadways within a residential neighborhood, which are prone to flooding causing the asphalt roadway to be in poor condition. These roadways are adjacent to the Hard Rock Hotel which appear to cause additional traffic and congestion, especially during a rain event. This project entails designing a new stormwater system and new regraded asphalt roadway in an effort to alleviate flooding within the travel lanes, reduce congestion and improve public safety.
	This project alleviates flooding and constructs a new asphalt roadway to improve potholes, congestion, traffic flow and public safety.

Project Objective

Work Mix	Capacity Increase, Widening
Phase	Construction
Fiscal Year 2020 Recommendation	YEAR 1 - Construction
Recommended Phase Funding	\$4,859,167
City Submitted Information	

SW 39 St to Orange Dr

Project Description

Project Scope

This third phase of corridor improvements continues to improve the entire Davie Road segment within the Town to include roadway and infrastructure improvements and streetscape enhancements. The improvements include milling and resurfacing the existing roadway, modifying drainage to accommodate sidewalk widening where possible, constructing landscaped medians and expanding sidewalk plantings, adding mid-block crosswalks, new LED street lighting, wayfinding signage, and shared bike lanes.

Project Objective

The Davie Road Corridor is bordered on both sides (east/west) by multiple ongoing redevelopment projects. Some of these new redevelopment projects include: a new Town Hall, multiple mixed-use sites which consist of commercial services and residential units. Once Downtown Davie has been redeveloped and these projects become fully occupied there is anticipated to be a significant increase in pedestrian traffic. This project improves pedestrian safety and mobility in Downtown Davie.

Work Mix	Landscaping, Hardscape, Signage, Lighting
Phase	Construction
Fiscal Year 2020 Recommendation	YEAR 1 - Construction
Recommended Phase Funding	\$800,000
City Submitted Information	

Project Description

Pedestrian lighting along streets to increase safety and promote a pedestrian friendly environment through our communities.

The City is seeking funds to install additional roadway lighting throughout city neighborhoods on city owned rights of way with decorative, LED options.

Project Scope

Public safety is the greatest concern with low light levels. Lighting increases both road and pedestrian safety.

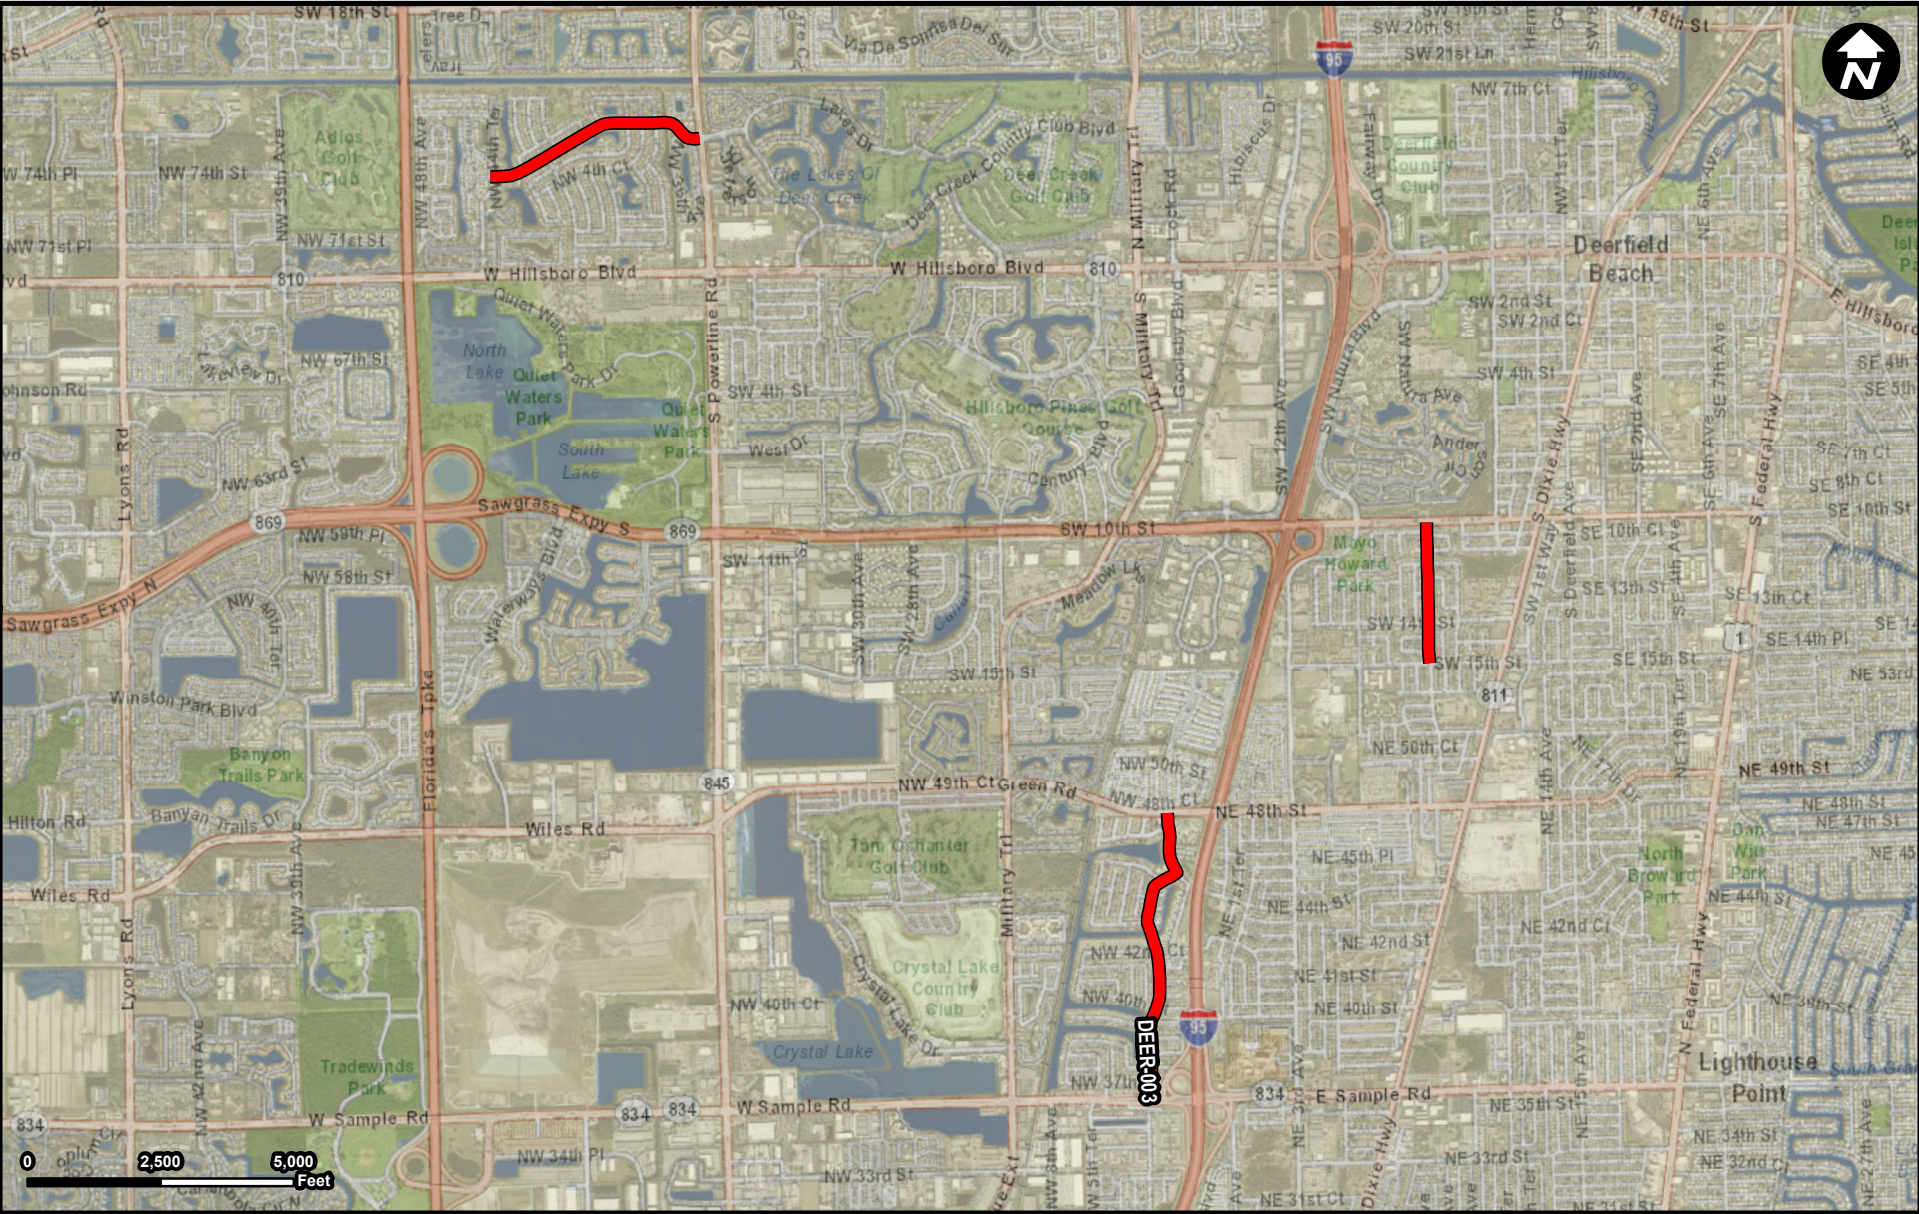

Project Objective

Estimated Project Cost	\$800,000
Project Type	Complete Streets, Safety
Primary Work Mix	Lighting
Secondary Work Mix	Safety Project
Has design been completed?	No
If Design completed, what percent?	
Is right-of-way required?	
Has right-of-way/utility relocation coordination occurred?

Construction Readiness Review	
Detailed budget provided?	Yes
Project timeline provided?	Yes
Is the project ready to submit for permits?	Yes

Readiness Review Comments:

The City provided shop drawings and detailed cost estimates for the proposed improvements and are ready to bid the project and are just waiting on the Surtax funding outcome. Project entails pedestrian lighting improvements along public roads throughout the City to improve pedestrian and vehicle visibility. The City provided lighting shop drawings and cost estimates for each discrete roadway segment. The cost estimate is in line with current industry pricing.

Work Mix	Resiliency Improvements
Phase	Construction
Fiscal Year 2020 Recommendation	YEAR 1 - Construction
Recommended Phase Funding	\$1,075,115
City Submitted Information	
Project Description	Storm water improvements include drainage structures, storm water piping, an exfiltration water quality system, and a connection to Park Road's storm water system. These improvements are a rehabilitation and upsizing of an existing drainage system.
Project Scope	This is primarily a roadway drainage project adding drainage on Southwest 25th Street from 31st Place to Patrick Behan Park and into a new outfall into the lake. It also intercepts and picks up drainage on Park Road at 25th Street to reduce flooding. Secondly it will include roadway restoration of damages from continual flooding. The drainage includes a pump station, gravity drainage and force main.
Project Objective	The town has had a problem with drainage since the DOT built I-95 and raised Hallandale Beach Blvd. and Pembroke Rd. blocking all natural outfalls for drainage from the Town. These improvements will enable the water to be transferred to Lake Trinity which has a pumped outfall. It would be cost prohibitive to raise all the roadways, businesses, and residents to allow natural flow to resume.
Estimated Project Cost	\$1,075,000

Crosswalks, bike lane buffer, traffic calming

Project Description

Project Scope	Raised intersections are proposed along NE 15th Ave at the intersection of NE 15th Ave and NE 24th St, NE 22nd St, and NE 21st St. Another is proposed between Colohatchee Park and the Boat Ramp. This project also consists of the installation of 5 foot wide sidewalks on the south side of NE 24th St between NE 15th Ave and NE 13th Ave and the north side of NE 24th St between NE 15th Ave and NE 17th Terr. A raised intersection will be installed at the intersection of NE 24th St and NE 16th Ave.
----------------------	--

Project Objective	This project fulfills an existing desire of the residents of Wilton Manors to provide safer roadway conditions (NE 15th Avenue) and better connectivity and safety for pedestrians (NE 24th Street). The raised intersections will slow traffic along a curved roadway that has residents very concerned and has a history of accidents. The sidewalk addition will provide complete connectivity between NE 15th Avenue and our recently completed Complete Streets project at Old Dixie Highway.

SR84 to Nova Dr

Project Description

Project Scope	The proposed scope of work includes upgrades to College Avenue from Nova Drive to State Road 84, for approximately 0.5 miles. The existing 3-lane road will be widened to a 4-lane divide road with an 11' raised landscaped median with ADA compliant 5-6' sidewalks on both sides of the roadway. The existing drainage system will be extensively modified as the new curb line is constructed, new curb inlets will be installed and existing potable water appurtenances such as hydrants will be relocated.
----------------------	---

Project Objective	This project is vital to the South Florida Educational Center and the Regional Activity Center (RAC), one of the Town's redevelopment areas, as College Avenue serves as one of the major north-south connection through the area. This project will raise the level of service by upgrading College Avenue to 4 lanes as outlined in the RAC master plan and Town's Local Road Master Plan. These upgrades will improve traffic flow in the redevelopment area leading to a reduction of traffic congestion.
--------------------------	---

Estimated Project Cost	\$1,000,000

Work Mix	Capacity Increase, Widening
Phase	Construction
Fiscal Year 2020 Recommendation	YEAR 1 - Construction
Recommended Phase Funding	\$700,000
City Submitted Information	
Project Description	City portion of \$6.8 million MPO funded "Complete Streets" improvement project including paved sidewalks, bike lanes, pedestrian lighting, transit amenities, landscaping, safety median, traffic signal upgrades and crosswalks.
Project Scope	One half-mile new roadway configuration to include storm water drainage, center landscaped medians, parallel parking, bicycle lanes, pedestrian crosswalks, sidewalks with landscaping, pedestrian lighting, new traffic signalization, signage and way-finding, and site furniture to include benches, waste receptacles, bicycle racks, shade structures.
Project Objective	Hollywood Boulevard previously a four lane two-way roadway, with a center "suicide lane" and dual sided 60 degree angled parking. Limited means for pedestrian crossings. Mature and invasive Black Olive trees had lifted and broken sidewalks throughout, creating unsafe conditions for pedestrians. New project has reduced the traffic lanes, added a center landscaped median, safer parallel parking, bicycle lanes, five crosswalks, pedestrian lighted sidewalks.
Estimated Project Cost	\$700,000

City Submitted Information	

Project Description Beautification, median improvements, traffic calming, bike lane, drainage improvements

Project Scope Project consists in the beautification of NW 36th Terrace from Oakland Park Blvd to NW 28th Avenue. Improvements includes: median and curb improvements, lane reduction, traffic control devices installation, landscaping and drainage.

Project Objective NW 36th Terrace is currently being utilized as a cut through to the Eastgate community. In addition, there has been some flooding issue in that area. The increased traffic is causing safety concerns for the adjacent community. Installation of dedicated bike lane, traffic control devices and drainage improvements will alleviate this issue.

Lots and Structures

Project Description

Project Scope

The project consists of the construction of a 32 lot parking facility on a 0.52 acre parcel, providing connectivity to both Colohatchee Park and NE 15th Street. The lot will include a trailhead connecting to existing trails in the park. NE 15th Avenue has existing dedicated bike lanes and transit stops within walking distance of the parcel.

Project Objective

The project addresses a few of local issues. The first is a lack of parking for the City's newly renovated Colohatchee Park. This park is one of the premiere dog parks in the region. Currently access is difficult and not ADA compliant. Parking is limited as well. The project will also include a new trail head connecting to existing multipurpose trails within the park and to existing dedicated bicycle lanes and nearby bus stops on NE 15th Avenue.

Estimated Project Cost	\$15,000,000

Fiscal Year 2020 Recommendation	YEAR 1 - Planning
Recommended Phase Funding	\$600,000
City Submitted Information	
Project Description	Construction of new sidewalks where none exists, and replacement of asphalt paths with ADA compliant concrete sidewalks.
Project Scope	Refer to 5 subarea maps within the City of Coral Springs (attached) that highlight the locations of asphalt sidewalks (red lines) proposed to be replaced with concrete. An attached spreadsheet breaks out the individual sidewalk segments identified within each subarea on the map with additional scope, linear feet of sidewalk, and project descriptions provided on the attached spreadsheet. 50% design plans for NW 40 St are provided
Project Objective	This project addresses areas within the City where asphalt sidewalks or missing sidewalk links are converted to concrete. The identified asphalt sidewalks were installed prior to the ADA and are substandard. Many were constructed as part of the drainage system. Sidewalks provide vital pedestrian links to schools, parks, transit stops, employment, shopping, and recreational opportunities. Without ADA compliant sidewalks many people are forced to walk in the street to reach their destination.

SR7 to SW 67 Ave

Project Description

Project Scope

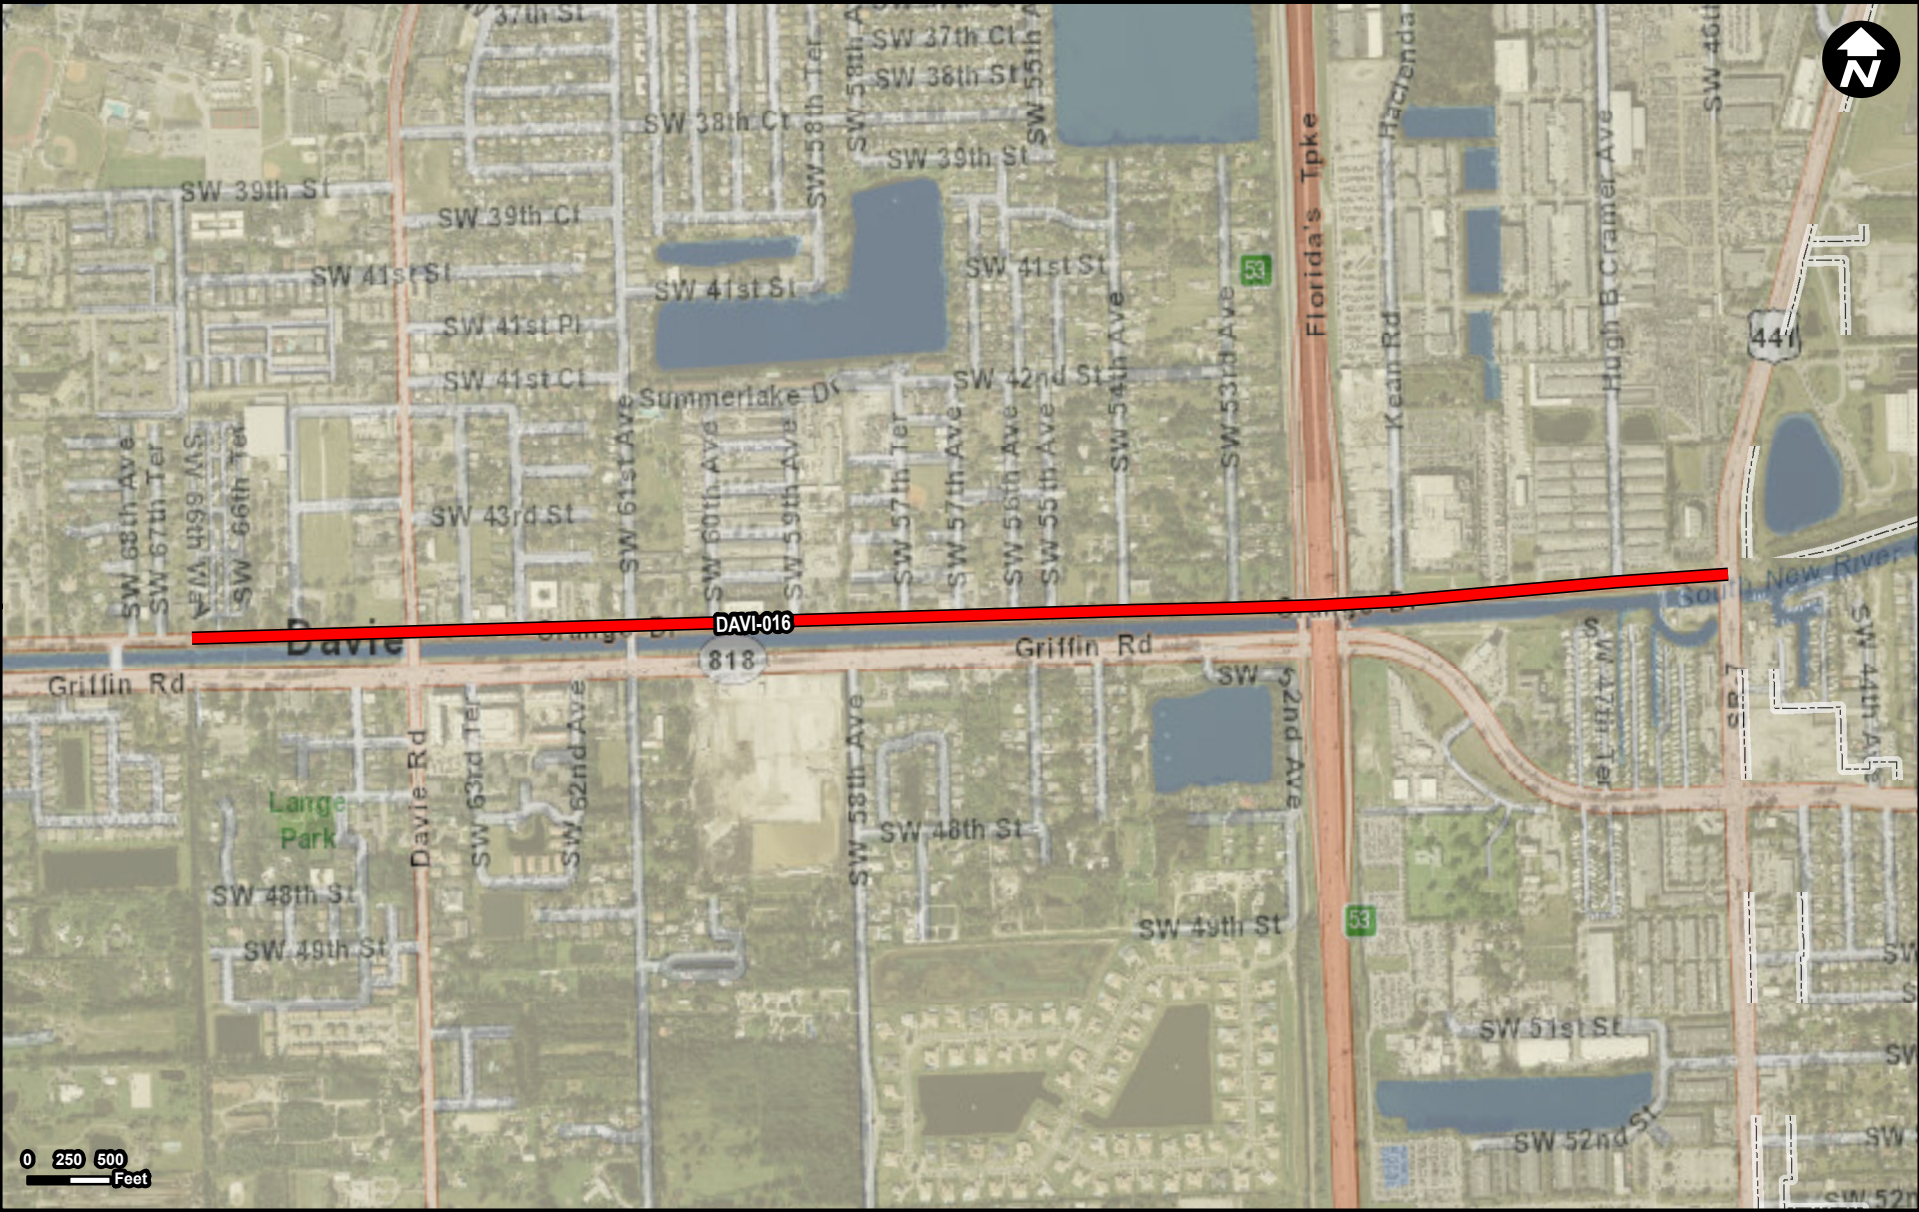

Upgrading Orange Drive to a 3-lane major collector with a shoulder from SW 67th to the Florida Turnpike. Bike lanes on the south side of the roadway will not be necessary due to the presence of the linear park.

Project Objective

From the Florida Turnpike to State Road 7 this project would upgrade Orange Drive to a 5-lane major collector to provide additional capacity on the roadway to serve adjacent industrial and commercial properties.

Estimated Project Cost	\$3,000,000

From Location	SW 10 Street
To Location	NE 48 St
Work Mix	Capacity Increase, Widening
Phase	Design
Fiscal Year 2020 Recommendation	YEAR 1 - Design
Recommended Phase Funding	\$480,000
City Submitted Information	
Project Description	Reconstruction of FAU Research Blvd. from SW 10th Street to NE 48th Street. The project entails increasing the number of lanes from 2 to 4, adding landscaped medians, bike lanes, linear walking trail, street lighting and proper roadway drainage.
Project Scope	The proposed project scope includes street widening for emergency evacuation routes, the addition of sidewalks, bicycle, and transit facilities to encourage multi-modalism, innovative intersection design, installation of broadband, underground utilities, landscaping, lighting, drainage and stormwater improvements for the entire area.
Project Objective	Road widening is crucial for SW 11th Way, which is a critical arterial parallel to Interstate 95. It serves to divert traffic for maintenance of traffic and provides access for business parks, communities, schools, and emergency operations. Expansion of this corridor will provide necessary capacity improvements to alleviate congestion, addresses water quantity and quality for flood resiliency, encourages multi-modalism, and enhances public safety.
Estimated Project Cost	\$4,000,000

To Location	From McNab Road to Westwood Blvd West
Work Mix	Bicycle Pedestrian Infrastructure
Phase	Planning
Fiscal Year 2020 Recommendation	YEAR 1 - Planning
Recommended Phase Funding	\$135,000
City Submitted Information	
Project Description	Extend the BikePath System in the City to connect various areas of the city to the Countywide system.
Project Scope	This year, Broward County completed a roadway project, enhancing Pine Island Road from Southgate Blvd to NW 79th Street. This bikeway project provides additional bikepaths, improved bus stops, and connectivity with the above County project plus two portions of the City's Bikeway Phase 3 project at NW 77th and NW 81st streets. Furthering this connectivity, the project will continue south to McNab Road, then west to Westwood Boulevard West, linking cyclists to Phase 1 of the City's bikeway network
Project Objective	Traffic counts continue to rise throughout the County, particularly in western communities like Tamarac. The project will enhance bicyclist and pedestrian safety and mobility as traffic counts and the population continues to expand. The project also assists in closing connectivity gaps between the City's bikeway network as well as to the County's cypress greenway bikeway system.
Estimated Project Cost	\$4,500,000

Project Description	Evaluation and construction of neighborhood traffic calming devices such as traffic circles, speed humps, and pedestrian crosswalks.
Project Scope	includes improvements to three roadways; installation of traffic circles on SW 81st Ave and Kimberly Boulevard, lane reduction on Kimberly Boulevard, installation speed humps, bike lanes, and median enhancements on Tam O'Shanter Boulevard. This project is divided into three phases to allow mobility through the City during construction. Phase 1 Kimberly Boulevard, Phase 2 Tam O' Shanter, Phase 3 81st Avenue. (cslip see attached)
Project Objective	Decrease speeding issues, better facilitate traffic movements, reduce congestion and accidents, while adding mobility with bike lanes..
Estimated Project Cost	\$5,000,000
Project Type	Complete Streets, Safety
Primary Work Mix	Safety Project
Secondary Work Mix	Signing/Pavement
Has design been completed?	Yes
If Design completed, what percent?	60
Is right-of-way required?	No
Has right-of-way/utility relocation coordination occurred?

Municipality	Parkland
Project ID	PARK-008
Project Name	Construction of Bike Lanes on Parkside Drive
From Location	Holmberg Road
To Location	Loxahatchee Road
Work Mix	Bicycle Pedestrian Infrastructure
Phase	Design
Fiscal Year 2020 Recommendation	YEAR 1 - Design
Recommended Phase Funding	\$180,000
City Submitted Information	
Project Description	Construction of bike lanes on Parkside Drive between Lox Road and Holmberg Road.
Project Scope	Install new bike lanes along Parkside Drive inclusive of pavement widening for bike lanes and extension of existing right and left turn lanes into Riverglades Elementary school, and associated drainage and pavement marking and signage. (approx. 1.5 miles)
Project Objective	Pedestrian connectivity to upcoming Lox Road and existing City bike/ sidewalk facilities on Holmberg Road. Also project is adjacent to a middle school which would encourage users (students/ parents/ staff) to use bikes as an alternative means of transportation from and to school. Extension of right and left turn lanes into elementary school will relieve congestion as currently Parkside Drive is congested for almost the entire segment during drop off and pick up times.
Estimated Project Cost	\$1,500,000
Project Type	Connectivity
Primary Work Mix	Bike Lane Sidewalk
Secondary Work Mix	
Has design been completed?	No
If Design completed, what percent?	
Is right-of-way required?	No

Project Name	West Dania Beach Blvd Bridge
From Location	
To Location	
Work Mix	Capacity Increase, Widening
Phase	Design
Fiscal Year 2020 Recommendation	YEAR 1 - Design
Recommended Phase Funding	\$480,000
City Submitted Information	
Project Description	Design and construction of new bridge over the C-10 Canal on West Dania Beach Blvd
Project Scope	The project is to conduct an engineering studies for project issues: permits, right-of-way, resiliency, seal level rise, mobility, navigation. These studies are estimated to cost \$300,000.
Project Objective	West Dania Beach Blvd is the only east/west corridor in the eastern portion of the City that has the potential to directly connect regional and local destinations (Beach - Downtown – to City Hall, Fire Station 1 and Library – Dania Pointe) and improve local conditions and services. The road dead ends at the C-10 canal. A bridge will create a new and much needed multimodal corridor that will improve connectivity, traffic circulation, neighborhood preservation, economic development, and mobility.
Estimated Project Cost	\$4,000,000
Project Type	Connectivity
Primary Work Mix	Bridge
Secondary Work Mix

Project Name	Winfield Blvd. Improvements
From Location	NW 63rd Ave
To Location	Sate Road 7 (US 441)
Work Mix	Bicycle Pedestrian Infrastructure
Phase	Design
Fiscal Year 2020 Recommendation	YEAR 1 - Design
Recommended Phase Funding	\$20,880
City Submitted Information	
Project Description	Improvements to Winfield Blvd. include sidewalks, crosswalks, and landscaping. Landscaping will be enhanced in the median located at the eastern section of the roadway. In addition, entrance signs and trees will be added as appropriate.
Project Scope	This project aims to create traffic calming and pedestrian improvements as a means to increase pedestrian safety along Winfield Blvd. This project includes additional sidewalks and crosswalks to create connectivity for pedestrians. The project also incorporates intersection and median improvements to calm traffic on this one mile road.
Project Objective	Winfield Blvd is a local street that is connected to SR 7 and is just over one mile in length. Due to the geometry of the road and no traffic calming devices, Winfield Blvd is a prime location for speeding vehicles which is high pedestrian safety risk. The single family homes surrounding Winfield Blvd are primarily school age children who are not eligible for transportation and must walk/ bike to the local schools: Margate Elementary, Margate Middle, and Coral Springs High School.
Estimated Project Cost	\$174,000
Project Type	Complete Streets, Safety
Primary Work Mix	Safety Project
Secondary Work Mix	Intersection
Has design been completed?	Yes

From Location	
To Location	
Work Mix	Resiliency Improvements
Phase	Design
Fiscal Year 2020 Recommendation	YEAR 1 - Design
Recommended Phase Funding	\$12,000
City Submitted Information	
Construct outfall from SW 61st Court to lake at SW 161 Avenue.	
Project Description	
Project Scope	The project consists of excavation, clearing, installation of 1,000 linear feet of reinforced concrete (RCP) drainage pipe, installation of Florida Department of Transportation (FDOT) specified drainage inlets and a terminal headwall, associated grates, associated erosion control measures, swale re-grading, street and driveway restoration, and installation of grass sod. These improvements will be installed along SW 61st Court and SW 61st Avenue.
Project Objective	The benefit of the project is to significantly reduce flooding during heavy rainfall events. Currently, the roadway is prone to extensive and prolonged flooding within the project limits due to the lack of positive drainage connections.
Estimated Project Cost	\$100,000
Project Type	Stormwater/Resiliency
Primary Work Mix	Safety Project

LOCATION MAP

Municipality	Sunrise
Project ID	SUNR-075
Project Name	Oakland Park Blvd Multi-Use Path
From Location	Sawgrass Expressway
To Location	Eastern City Limits
Work Mix	Bicycle Pedestrian Infrastructure
Phase	Design
Fiscal Year 2020 Recommendation	YEAR 1 - Design
Recommended Phase Funding	\$390,000
City Submitted Information	
Project Description	Construct a multi-use path along the south side of Oakland Park Boulevard from the Sawgrass Expressway to the City limits. Reconstruct the existing sidewalk or construct a new multi-use trail where a sidewalk does not exist.
Project Scope	Construct a buffered 10 to 12 foot multi-use path parallel to Oakland Park Boulevard on the south side. Reconstruct existing sidewalk and/or construct new multi-use trail where a sidewalk does not exist.
Project Objective	This project would eliminate gaps in the bicycle and pedestrian network along Oakland Park Blvd, that are critical barriers to safety and connectivity along a significant corridor locally and regionally. The multi-use trail creates effective bicycle and pedestrian connectivity along a corridor that connects to public places, high ridership BCT bus line, and connects the local businesses with adjacent residents. It provides a complete street with other travel mode options.

KAREN M. BROOKS
CITY MANAGER

March 10, 2020

Andrew Riddle, AICP
Manager of Municipal Surtax Services
Trade Centre South
100 West Cypress Creek Road
6th Floor, Suite 650
Fort Lauderdale, Florida 33309-2181

Dear Mr. Riddle,

The City of Coconut Creek was pleased to see three of our projects ranked for design in the Municipal Surtax Capital Projects Draft Cycle 1 Program of Recommended Projects. Additional information regarding two of the projects, COCO-016, Sample Road Multi-Purpose Path, and COCO-024, Transit Stops, was sent to you and Kerrie MacNeil yesterday in preparation of the April 2, 2020, Oversight Board meeting.

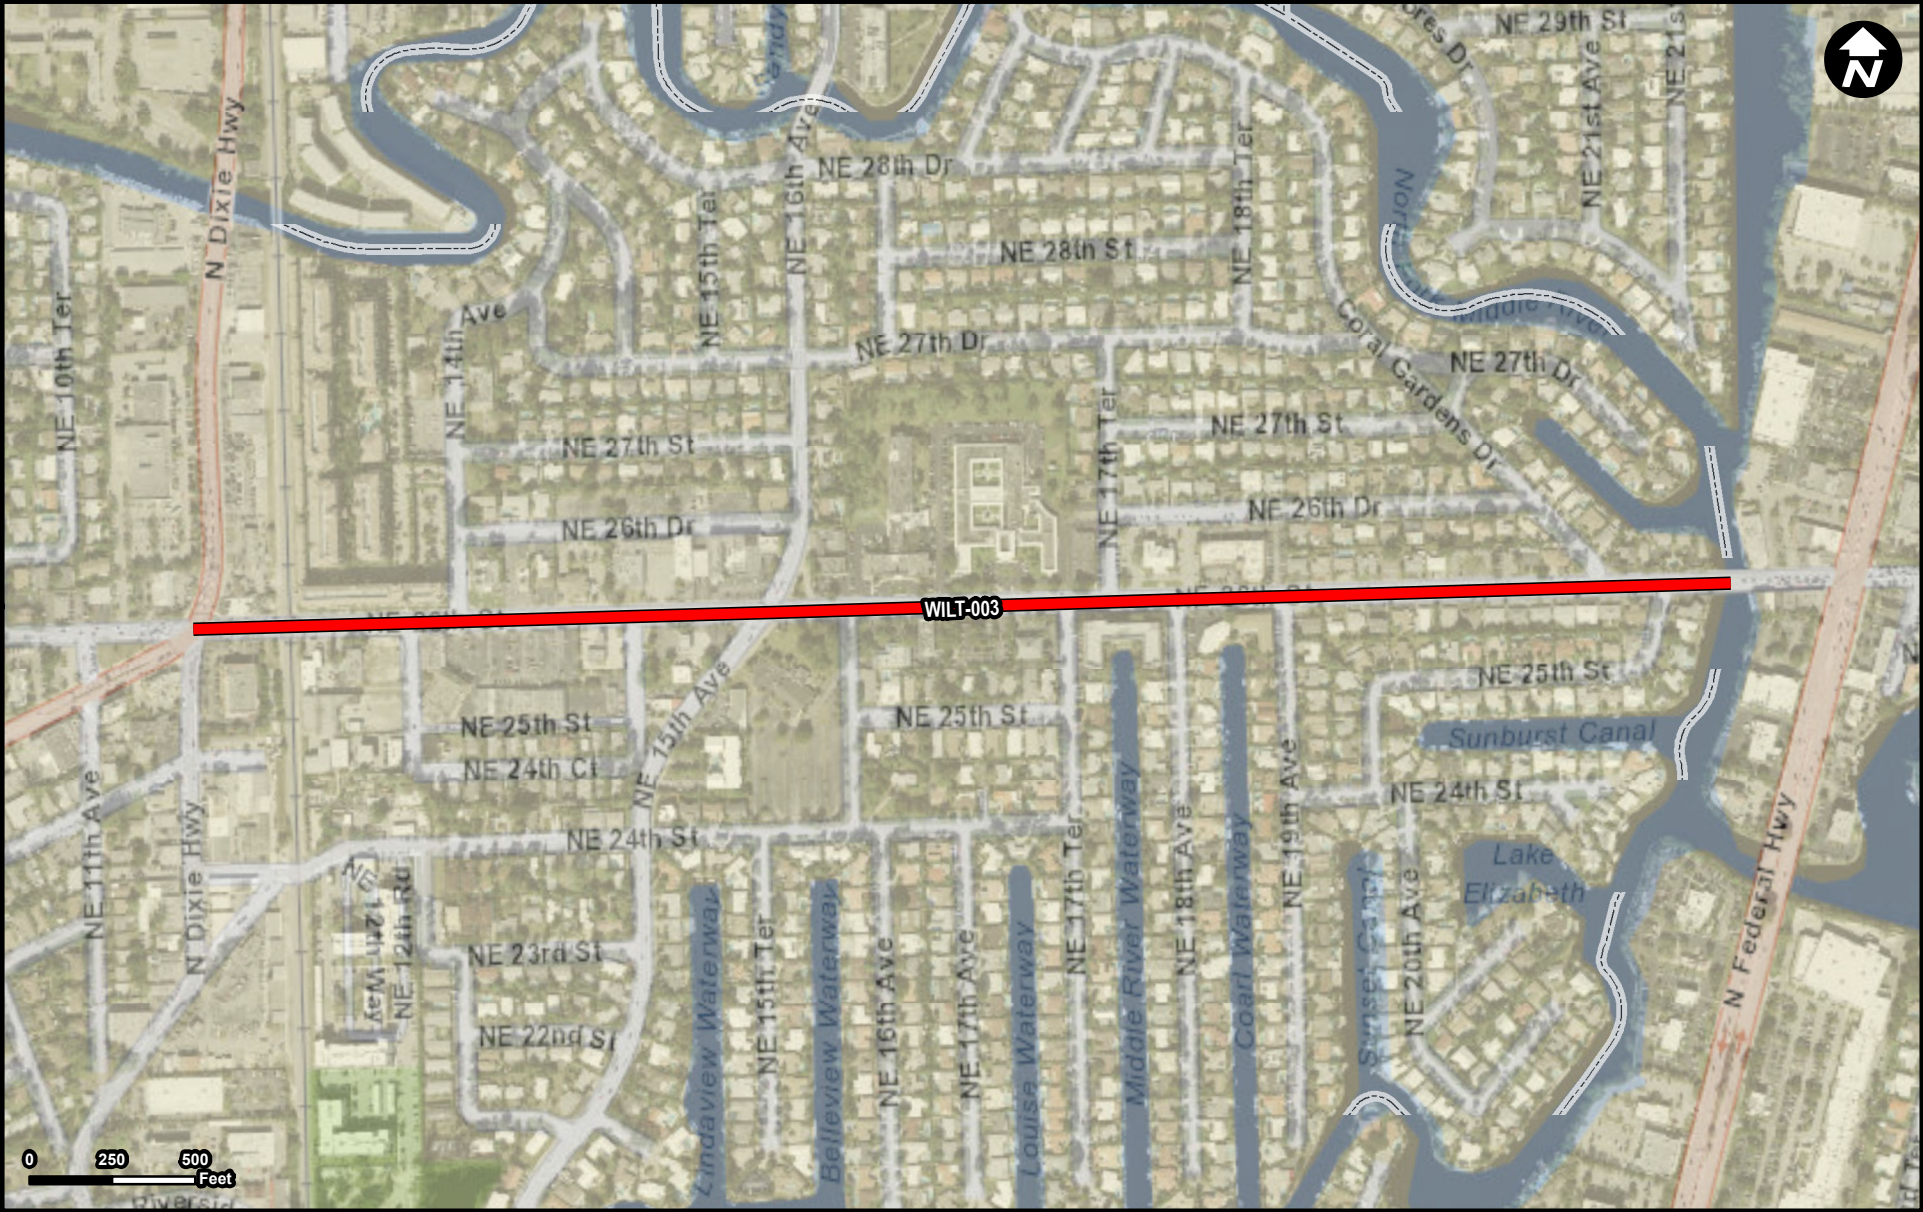

At this time, I would like to request that Project COCO-020, Hillsboro Boulevard Sidewalk Improvements, be removed from FY 2020 surtax funding consideration. We would, however, still like this project to be considered as part of the five year plan. If you have any questions, please contact me at kbrooks@coconutcreek.net or 954-973-6720.

Thank you for your consideration.

Karen M. Brooks
CITY MANAGER

Municipality	Wilton Manors

To Location	City Limits at Eastern Middle River, just west of US 1.
Work Mix	Bicycle Pedestrian Infrastructure
Phase	Design
Fiscal Year 2020 Recommendation	YEAR 1 - Design
Recommended Phase Funding	\$240,000
City Submitted Information	
	Traffic calming, bike & pedestrian lanes
Project Description	
Project Scope	This project will consist of the widening of existing sidewalks on both sides of NE 26th Street between Dixie Highway and the city limits at the Middle River bridge. The existing travel lanes will be narrowed by one foot and the existing shoulders will be utilized. The sidewalk widths are proposed to be increased from 4 to 7 feet where feasible.
Project Objective	The current sidewalks within the corridor do not meet ADA requirements. They are only four feet in width and various poles and other conflicts are located within the existing sidewalks. The project will result in a safer pedestrian environment along the corridor. This will also allow for improved bus shelters.

Storm Water Drainage Improvement

Project Description

Construct drainage improvement on Stirling Road from Hiatus Road to SW 10 Avenue (Palm Avenue), in association with an overall roadway improvement project.

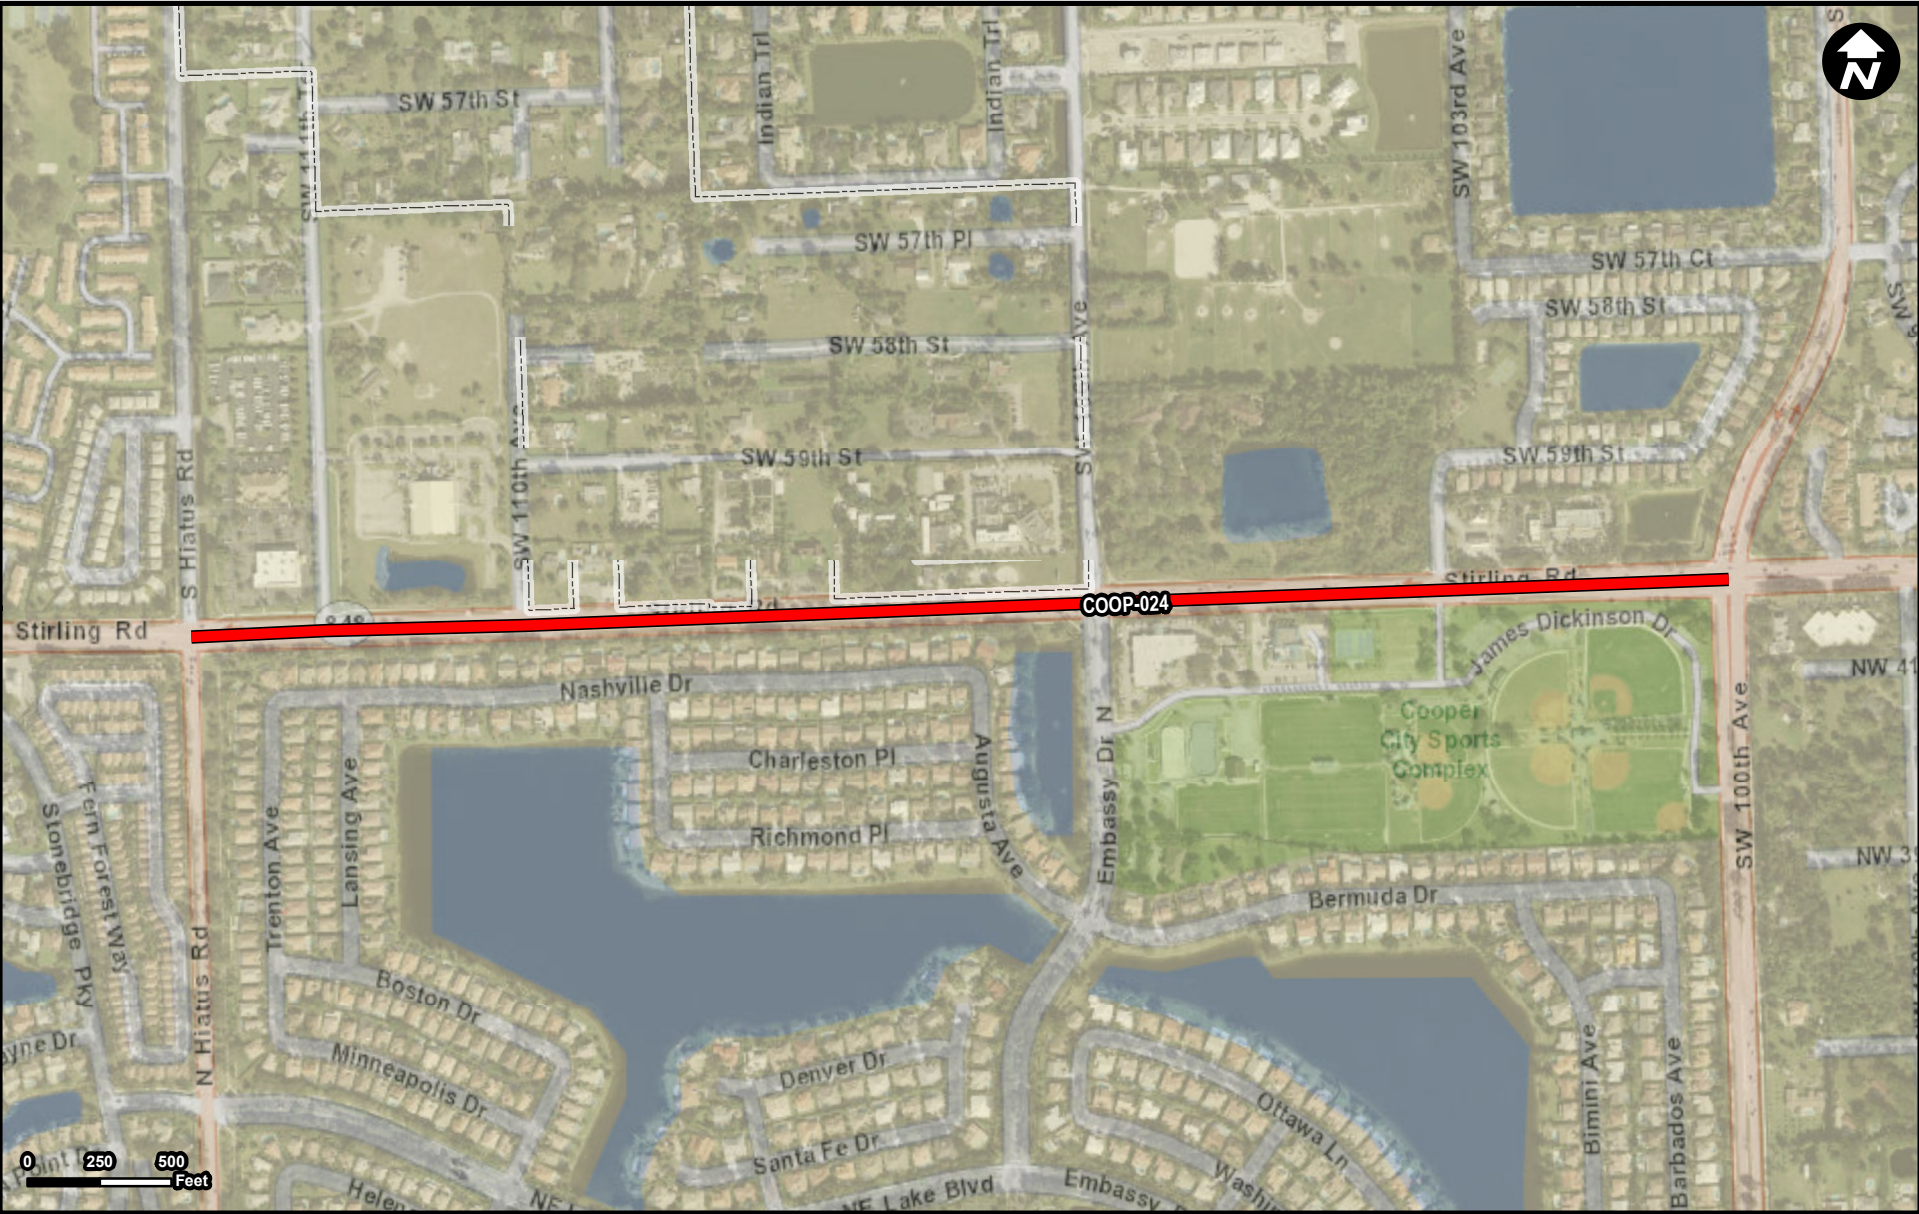

Project Scope

This project will address inundation of travel lanes during rain events, which is currently a safety issue. This project is the best solution because it will most effectively resolve the roadway inundation.

Project Objective

Estimated Project Cost	\$2,400,000
Project Type	Stormwater/Resiliency

Work Mix	Bicycle Pedestrian Infrastructure
Phase	Design
Fiscal Year 2020 Recommendation	YEAR 1 - Design
Recommended Phase Funding	\$312,000
City Submitted Information	

City funding for roadway improvements including sidewalk, bike lanes and medians.

Project Description

Reconstruct existing 2-lane undivided/ roadway to provide a divided 2-lane roadway with median, bike lanes and sidewalks for the entire corridor (approx. 1.7 miles).

Project Scope

Project Objective

Pedestrian and bike connectivity to City, County and State facilities. The addition of the median will also act as a traffic calming measure on a roadway that is currently too narrow, adjacent to the Hillsboro Canal and where speed limits are not observed and traffic is expected to increase with the currently development at the wedge.

Estimated Project Cost	\$2,600,000

Fiscal Year 2020 Recommendation	YEAR 1 - Design
Recommended Phase Funding	\$120,000
City Submitted Information	
Project Description	Construct bicycle/pedestrian greenways in order to foster safe off-road passageways for bicyclists and pedestrians in the City.
Project Scope	The Greenway project will consist of the construction of a multi-use path to allow pedestrians and bicyclists as safe passage to Sample Road. The length of the project will include bioswales, recycling containers, energy-efficient lighting, solar operated call stations, and benches or exercise stations.
Project Objective	The proposed Greenway will connect the eastern most portion of Fire Fighters Park to Sample Road. This multi-use facility will provide a safe route to school for the children of Margate going to Coral Springs High School, Margate Middle School or Margate Elementary School. This project also encourages a healthy, active community by making biking and walking a safe, easy, and comfortable choice.
Estimated Project Cost	\$1,000,000

Fiscal Year 2020 Recommendation	YEAR 1 - Design
Recommended Phase Funding	\$5,160
City Submitted Information	
Construct outfall from Dykes Road to canal at SW 164th Avenue.	
Project Description	
Project Scope	The project consists of excavation, clearing, installation of 1,500 linear feet of reinforced concrete (RCP) drainage pipe, installation of Florida Department of Transportation (FDOT) specified drainage inlets and associated grates, associated erosion control measures, swale re-grading, street and driveway restoration, and installation of grass sod. These improvements will be installed along SW 162nd Avenue Court, SW 160th Avenue, and along drainage easements that connect the two respective road
Project Objective	The benefit of the project is to significantly reduce flooding during heavy rainfall events. Currently, the roadway is prone to extensive and prolonged flooding within the project limits due to the lack of positive drainage connections.
Estimated Project Cost	\$43,000

Project Description	Transportation planning for determining the next steps in connecting and expanding the City's multimodal network to and with the county.
Project Scope	The development of a physical Multimodal Transportation Master Plan for the City of Tamarac which considers opportunities to improve multi-modal operations on all major thoroughfares, predicated on Complete Streets and Congestion Management/Livability Planning. The Plan would analyze the existing transportation data and system deficiencies within the City's transportation network and recommended strategies to mitigate or resolve these issues in the short and long term.
Project Objective	The Plan would deal with the management of congestion issues and pursue ways of promoting connectivity, citywide. The Plan would further provide the necessary frame work to identify a comprehensive vision for Tamarac's transportation systems and enhance the quality of life for its residents.

Project Description	Stormwater pump installation and improvement of stormwater conveyance system
Project Scope	Project delivery method will be design build. Install a stormwater collection network, transmission piping, 3 new pump stations, a bio-swale, and outfalls to the West Lake Preserve and to Meadowbrook Lake.
Project Objective	This project addresses flooding above the crown of the roadways and multiple loss properties. This project replaces 2 dilapidated and undersized pump stations and provides outfalls to a bio-swale, to West Lake east of 5th Avenue, and to Meadowbrook Lake to the north. This is the best solution, because water is trapped in the neighborhood by SE 5th Avenue, which is a high point and effectively acting like a dam. This solution moves the stormwater east of this ridge towards West Lake Park.

Project Name	Bus shelter repair and replacement
From Location	
To Location	
Work Mix	Transit
Phase	Design
Fiscal Year 2020 Recommendation	YEAR 1 - Design
Recommended Phase Funding	\$45,000
City Submitted Information	
	Replace aging bus shelters.
Project Description	
Project Scope	An attached list of bus shelters provides an inventory of City owned and maintained bus shelters sorted by date of installation. Of the 66 bus shelters in the City 35 are greater than 10 years old and 56 shelters are greater than 9 years old. Many of these bus shelters are showing signs of deterioration and need replacement. The City plans to replace the existing green Tolar shelters and black Landscape Forms shelters where easements or ROW are already in place.
Project Objective	Transit shelters provide a place for passengers to get out of the sun and/or rain as they await the arrival of their bus. Having a bus shelter in good repair provides a safety and a degree of comfort as well as providing a visual reminder of the important role of transit is to the City.
Estimated Project Cost	\$375,000
Project Type	Transit
Primary Work Mix	Transit Improvement
Secondary Work Mix

Municipality	Sunrise
Project ID	SUNR-061
Project Name	Oakland Park Blvd Bicycle Lanes
From Location	Flamingo Rd
To Location	Sunrise city limits
Work Mix	Bicycle Pedestrian Infrastructure
Phase	Design
Fiscal Year 2020 Recommendation	YEAR 1 - Design
Recommended Phase Funding	\$720,000
City Submitted Information	
Project Description	New bicycle lanes along Oakland Park Boulevard from Flamingo Road to the eastern city limits as part of the City's Complete Street Initiative.
Project Scope	Oakland Park Blvd cross section, narrow travel lanes to accommodate 5ft bike lane on both sides of the roadway.
Project Objective	In January 2015, after extensive public input, Sunrise City Commission adopted the Bicycle & Pedestrian Greenways and Trails Master Plan. A framework for future improvements that support safe and convenient walking, biking, & access to transit services. The proposed project (reflected in the Master Plan) will relieve traffic congestion and increase/enhance the existing bicycle network connectivity as well as eliminate critical barriers to safety and connectivity.
Estimated Project Cost	\$6,000,000
Project Type	Connectivity
Primary Work Mix	Bike Lane Sidewalk
Secondary Work Mix	Safety Project

Municipality	Margate
Project ID	MARG-033
Project Name	Firefighters Pk-Winfield Blvd. Bridge
From Location	Eastern most portion of Firefighters Park -2500 Rock Island Rd, Margate, FL 33063
To Location	Just east of the One Mile Canal connecting to Winfield Blvd.
Work Mix	Bicycle Pedestrian Infrastructure
Phase	Design
Fiscal Year 2020 Recommendation	YEAR 1 - Design
Recommended Phase Funding	\$24,000
City Submitted Information	
Project Description	Construct a pedestrian bridge connecting the homes on and around Winfield Blvd. to Firefighters Park.
Project Scope	The pedestrian bridge will connect from Winfield Blvd to the eastern most portion of Fire Fighters Park. Firefighters Park is adjacent to an FPL easement which runs the entire length of Rock Island Road to Sample Road thus creating a safe route to school for children who must currently use SR7. Coral Springs High School is on the North East Corner of Sample Road and Rock Island Road.
Project Objective	The boundaries for Coral Springs High school incorporates a large percentage of Margate children who are not eligible for transportation due to the school's proximity. Based on the current configuration of the pedestrian travel ways, the only route to school for the children on the east side of the One Mile Canal is SR 7. SR 7 is a critical area of concern due to frequent pedestrian fatalities. The construction of a pedestrian bridge over the One Mile Canal will provide a safe route to school.
Estimated Project Cost	\$200,000
Project Type	Connectivity
Primary Work Mix	Bridge
Secondary Work Mix	Safety Project

Municipality	Southwest Ranches
Project ID	SWRA-037
Project Name	Drainage Project: Dykes Road and SW 51st Manor
From Location	SW 51st Manor and neighboring residential properties
To Location	An existing stormwater facility to the east of SW 160th Avenue (Dykes Road).
Work Mix	Resiliency Improvements
Phase	Design
Fiscal Year 2020 Recommendation	YEAR 1 - Design
Recommended Phase Funding	\$36,000
City Submitted Information	
Install drainage structures and piping from Dykes Road east to canal	
Project Description	
Project Scope	The project consists of excavation, clearing, installation of approximately 1,500 linear feet of reinforced concrete (RCP) drainage pipe, installation of Florida Department of Transportation (FDOT) specified drainage inlets and a terminal headwall, associated grates, associated erosion control measures, swale re-grading, street and driveway restoration, and installation of grass sod. These improvements will be installed along a drainage easement parallel to SW 51st Manor.
Project Objective	The benefit of the project is to significantly reduce flooding during heavy rainfall events. Currently, the roadway is prone to extensive and prolonged flooding within the project limits due to the lack of positive drainage connections.
Estimated Project Cost	\$300,000
Project Type	Stormwater/Resiliency
Primary Work Mix	Safety Project
Secondary Work Mix	
Has design been completed?	No
If Design completed, what percent?	
Is right-of-way required?	No
Has right-of-way/utility relocation coordination occurred?
