# 1. Overview

## Development

The Broward Metropolitan Planning Organization (MPO) is required to develop a List of Priority Projects (LOPP) in coordination with Florida Department of Transportation (FDOT) District Four planning staff. The list is submitted to the District by August 1 annually [s.339.175 (8)(a) and (b), F.S.]. FDOT uses the LOPP to develop the Draft Tentative Work Program (DTWP) that is presented to the MPO each fall, which in turn is used to develop the following year's Transportation Improvement Program (TIP). The Fiscal Year (FY) 2027 LOPP is used to develop the FY 2028-2032 DTWP and the FY 2028-2032 Broward MPO TIP.

The LOPP is a core product of the MPO that serves as a bridge between the MPO's Long Range Transportation Plan (LRTP)/Metropolitan Transportation Plan (MTP) and the TIP. Figure 1 shows the Broward MPO core product development process. The LOPP is used to set funding priorities for federal and state funds within our region. Only projects contained in the MTP are eligible for inclusion on the LOPP. Figure 2 presents the relationship among MTP, LOPP, and TIP.

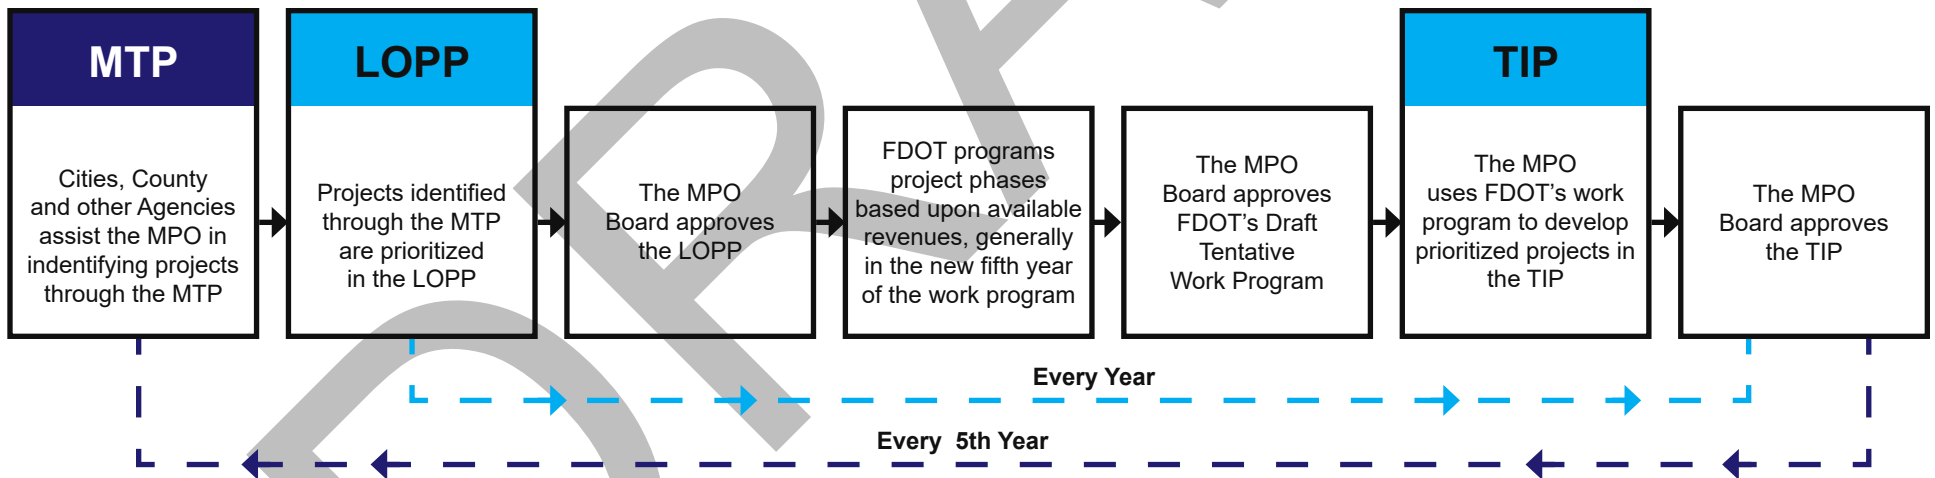

Figure 1 Core Product Development Process

# Overview

Program	Allocation
 Technology	12%
 Roads for Families	51%
 Safety	10%
 Highways & Freight	10%
 Economic Development	12%
 Infrastructure Hardening	5%
<b>Total</b>	<b>100%</b>

Table 1 Programs and funding allocation

In addition, the LOPP assigns a preferred funding source for each prioritized project that is consistent with the 2050 MTP's cost feasible plan. The funding sources are indicated as State, Federal, Local or any combination of the three. To facilitate project delivery, the LOPP emphasizes a "Program Ready" concept. "Program ready" means that a project includes a clear scope of work, approved resolution, cost estimate, and collaboration with partners. Projects that meet all of these four criteria are eligible for funding. For an example of how these concepts are illustrated in the LOPP, please refer to Figure 3.

## Unified Planning Work Program (UPWP)

Besides the six programs mentioned earlier, funding for the Broward MPO's Unified Planning Work Program (UPWP)/budget is top priority. The MPO's UPWP contains the agency's Strategic Business Plan activities, planning efforts, and operating budget for a two-year period. The UPWP includes a description of the planning work and resulting products, who will perform the work, time frames for completing the work, the cost of the work, and the source(s) of funds. Further, the UPWP provides a comprehensive picture to citizens and stakeholders who wish to see how federal and state transportation planning dollars are to be spent by the Broward MPO, local governments, and transit agencies providing services to Broward. The UPWP is developed by MPO staff in consultation with partner agencies, municipal staff, and input from local citizens and stakeholders. The information collected is incorporated into the UPWP and budgeted accordingly. To support services that the MPO provides to the Broward region, the Broward MPO assigns Surface Transportation Program – Urban areas >200K (SU) funds to the UPWP. Available MPO attributable funds for the six programs excludes SU funds already allocated to UPWP.

Figure 2 Relationship among MTP, LOPP and TIP

The 2050 MTP was approved at the December 2024 MPO Board meeting. The Cost Feasible Plan, as a component of the MTP including a list of prioritized projects, was approved with it. The Cost Feasible Plan includes six funding programs in order to account for the region’s transportation needs. To be consistent with the 2050 MTP and the funding sources assumed in the financial plan of the 2050 MTP, the LOPP is organized by six funding programs. It utilizes the 2050 MTP’s allocations for the Broward MPO’s attributable funds as shown in Table 1.

# 2. Project Prioritization

## Prioritization Process for Highways & Freight, Roads for Families, Technology, and Economic Development

The prioritization criteria are based on the MTP goals and objectives (adopted by the MPO Board on May 11, 2023) include relevant required Performance Measures identified in the FAST Act, and were designed for a GIS-based analysis to ensure objectivity in the scoring to the greatest extent practical. The prioritization process was built on the Commitment 2045 MTP effort and utilized the same six planning factors of mobility, accessibility, safety, demographics, environmental stewardship, and economic vitality. However, for the Route to 2050 MTP, these planning areas were paired to create three planning factors: Mobility and Economic Vitality, Accessibility and Demographics, and Safety and Infrastructure Hardening. In total, 14 criteria, listed in below were used to score projects in a mode-neutral manner.

Prioritization Factor	Criteria
<b>Mobility (18 points) &amp; Economic Vitality (12 points)</b>	<ol style="list-style-type: none"> <li>1. Providing an alternative to single occupant vehicles</li> <li>2. Reducing peak period delay or transit travel time</li> <li>3. Improving or increasing the Intelligent Transportation System infrastructure</li> <li>4. Improving travel time on a freight corridor (truck traffic &gt;5% of AADT)</li> <li>5a. Improving pavement or bridge condition</li> <li>5b. Improving transit asset condition</li> </ol>
<b>Accessibility (24 points) &amp; Demographics(12 points)</b>	<ol style="list-style-type: none"> <li>6. Supporting transit ridership</li> <li>7. Coordinating with housing</li> <li>8. Reducing travel time to or within a key activity center</li> <li>9. Providing a non-auto connection to an activity center, essential destination, or tourist destination</li> <li>10. Serving an identified equity area</li> <li>11. Failing to impact an existing residence or business</li> </ol>
<b>Safety (22 points) &amp; Infrastructure Hardening (12 points)</b>	<ol style="list-style-type: none"> <li>12. Intersecting with the High Injury Network (HIN)</li> <li>13. Intersecting with a susceptible facility (based on Infrastructure Hardening analysis to identify facilities and areas susceptible to extreme weather and coastal inundation)</li> <li>14. Failing to impact wetlands, natural habitat, or historic resources</li> </ol>

Table 2: Prioritization factors and criterias for Highway & Freight, Roads for Families, Technology, and Economic Development funding programs.

Once all the transportation needs were identified they were evaluated through the project prioritization process, which scored and ranked transportation projects based on the criteria above. Points were assigned first by dividing a total possible score of 100 by the three factors. Then, the points associated with each factor were adjusted based on the significance of the factor relative to the MTP goals, and to establish a whole number instead of fractions. This resulted in the weighting of criteria being built into the associated total points available for each factor. Final prioritization scores are a result of the analysis and a total summation of each awarded point per criteria. This prioritization process and scoring approach was endorsed by the Broward MPO Board during its October 12, 2023, meeting.

## Prioritization Process for Roads for Economic Vitality (REV)

REV as one component of Roads for Families program, provides funding for small local transportation projects that will improve safety for all transportation users. The MPO facilitates this annual competitive grant program to fund projects such as transportation safety projects, traffic calming and intersection improvements, ADA compliance upgrades, and technology advancements (e.g., transit signal priority and traffic control devices). Projects funded through this program have a cap of \$4 million in construction costs per project.

REV uses an objective tool to evaluate and rank the applications submitted. This tool was developed with direction from the Board and uses several geographic datasets to score the projects. Evaluation criteria weights are 20% for safety, 20% for accessibility, 17% for demographics, 17% for mobility, 13% for economic vitality, and 13% for environmental stewardship.

## Prioritization Process for Infrastructure Hardening

Infrastructure Hardening, also considered in Commitment 2050, was a more defined effort to identify the Infrastructure Hardening network throughout the county for which mitigation and adaptation projects could be identified.

The assessment utilized previously completed efforts and data, with some updated data provided by Broward County, and focused on the following:

**Susceptibility**, which was comprised of the following three variables:

- Sensitivity: The capacity of a facility to handle variations in a climate stressor
- Exposure: The degree to which a facility is subjected to adverse weather extremes based on impact from the following identified stressors:
  1. Coastal Inundation
  2. Flooding, current and future (Precipitation & Storm Surge)
  3. Extreme Heat
  4. Future Groundwater Elevation

- Adaptive Capacity: The ability of the transportation network to deal with the loss of an impacted facility. This was based on the number of travelers affected and the detour lengths around each affected network segment.

**Demographics** in recognition of the challenges that socially susceptible populations can face in mobility and recovery, the MPO's Transportation Demographic Areas were incorporated into the assessment.

Susceptibility and demographics were combined (**85% susceptible roadways score + 15% demographic score = Infrastructure Hardening Network**) to identify the resulting Infrastructure Hardening network. The corridors identified through this effort were used in the prioritization process and a Infrastructure Hardening funding program was established to address the needs identified.

## Prioritization Process for Safety

The Broward Safety Action Plan (BSAP) identified and ranked 338 High Injury Network (HIN) corridor segments and prioritized eleven (11) of the HIN corridors for the development of Corridor Concept Plans. The ranking of the 338 corridors used a scoring point system that allocated points according to three criteria:

- Safety Score (40%) based on the Equivalent Property Damage Only (EPDO) weight for crashes then divided by the mileage of the HIN corridors.
- Risk Score (30%) based on the High Risk Network
- Demographics Score: based on the Economic Opportunity Composite Score.

The BSAP process advanced eleven (11) corridors for the development of Corridor Concept Plans based on context classification, number of lanes, posted speeds, cities represented and modal crash type for KSI (Killed and Serious Injury) crashes. The Corridor Concept Plans provided the process to coordinate with local stakeholders and agency staff to develop concept plans for the corridor segments. The top three locations have been incorporated into the MPO's MTP safety program through MTP amendment process.

For more information, see the BSAP Prioritization Report, BSAP Prioritization Report\_FINAL.

### 3. Broward MPO Priority List

# Unified Planning Work Program

The MPO prepares its operational budget every two years. In the planning world, the budget is known as the Unified Planning Work Program (UPWP) as it incorporates and describes all transportation planning activities and associated funding (budget) for the MPO and our planning partners in Broward. Our fiscal year (FY) begins July 1 and ends June 30. Each year, the MPO's financial statements and expenditures related to the budget are audited by an independent auditor.

DRAFT

# Economic Development Program

The Economic Development Program supports investments in transit infrastructure and enhancing accessibility to existing and planned transit stops and stations. It includes Economic Development Projects, which seek to improve the first/last mile connectivity between different modes of transportation and enhance the overall transit passenger experience. The Economic Development Projects identified are intended to support the premium transit network identified in Broward County's PREMO plan.

# Highways & Freight Program

The Highways & Freight Program includes initiatives that improve roadway capacity and operating conditions through geometric improvements on roadway networks. This program includes projects to enhance freight movement and alleviate congestion.

DRAFT

# Infrastructure Hardening Program

The Infrastructure Hardening Program is designed to support projects that mitigate the effects of weather extremes on the region's transportation infrastructure. These projects focus on enhancing the durability and adaptability of the transportation network. These projects were identified and prioritized through an assessment process that measured network sensitivity, exposure and adaptive capacity to extreme weather events.

DRAFT

# Roads for Families Program

The Roads for Families Program focuses on enhancing roadway infrastructure to address gaps in the local and regional network. This program also includes funding for the Roads for Economic Vitality (REV), a competitive grant program that provides funding to municipalities.

Phase	<2027	2027	2028	2029	2030	2031	Amount Funded	Funding Needed

# Safety Program

The Safety Program supports safety improvements, such as traffic calming and intersection improvements, identified through a county-wide safety analysis to reduce traffic-related injuries and fatalities. The program is separated into state and non-state projects.
