

Roads for Economic Vitality (REV) Program Evaluation Criteria

Base points range in value between 64 – 300 (not including bonus points/points deductions)

Economic Vitality						Safety		Access						Mobility			
33 percent 99 total points						33 percent 99 total points		20 percent 60 total points						14 percent 42 total points			
Employment Density		MTP Key Activity Centers		Demographics Analysis Tool (DAT)		High Injury Network		Community Facilities		Schools		Population Density		Transit Stops		Traffic Volume/Lane	
Indicator	Points	Indicator	Point	Indicator	Points	Indicator	Points	Indicator	Points	Indicator	Points	Indicator	Points	Indicator	Points	Indicator	Points
(1/2 mile buffer)		(1/2 mile buffer)		(1/2 mile buffer)		N/A		(1/2 mile buffer)		(1/2 mile buffer)		(1/2 mile buffer)		(1/4 mile buffer)		(200 ft buffer)	
Projects analyzed and awarded points based on connection to or adjacent to one or more Traffic Analysis Zones (TAZ) with employment density areas by percentage, identified by Broward County.		Projects analyzed and awarded points based on the total number of three types of MTP key activity centers (Community Redevelopment Areas and Broward Next Activity Centers) within the buffer.		Projects analyzed and awarded points based on the average of total composite scores from the Demographics Analysis Tool within the buffer area.		Projects analyzed and awarded points based on their relationship to the High Injury Network (HIN) which includes traffic related serious injury or fatal crashes during a five-year period.		Projects analyzed and awarded points based on the total number of activity centers (libraries, parks, city halls, & hospitals) within the buffer.		Projects analyzed and awarded points based on the total number of schools (public schools K-12, public/private colleges and universities) within the buffer.		Projects analyzed and awarded points based on connection to or adjacent to one or more Traffic Analysis Zones (TAZ) with population density areas by percentage, identified by Broward County.		Projects analyzed and awarded points based on number of transit stops (BCT and SFRTA / Tri-Rail) per ¼ mile of project length within the buffer.		Projects analyzed and awarded points based on the average traffic volume per lane within the buffer.	
Top 5% employment density	33	3+ activity centers	33	Average score of >3	33	75–100% of project length located along the HIN	99	3+ activity centers	15	3+ facilities	15	Top 5% population density	15	>4 stops	15	< 3,500 ave. traffic volume/lane	42
5-10% employment density	27	1 - 2 activity centers	22	Average score of 2 - 3	25	50-74% of project length located along the HIN	76	1 - 2 activity centers	10	1 - 2 facilities	10	5-10% population density	12	2 - 4 stops	10	3,500-7,500 ave. traffic volume/lane	32
10-15% employment density	21	0 activity centers	11	Average score of 1 - 2	17	25-49% of project length located along the HIN	53	0 activity centers	5	0 facilities	5	10-15% population density	9	<2 stops	5	7,500-12,000 ave. traffic volume/lane	22
15-20% employment density	15			Average score of 0 - 1	9	1-24% of project length located along the HIN	30					15-20% population density	6			> 12,000 ave. traffic volume/lane	10
< 20% employment density	9					0% of project length located along the HIN	7					< 20% population density	3
